

Simon Scott Stromberg | CBCP

Cyber Resiliency and Business Continuity Leader | Technology Resiliency Program Management | Industry Exercise Leadership
Greater Minneapolis–St Paul · simon@simonstromberg.com · simonstromberg.com · [linkedin.com/in/simonscottstromberg](https://www.linkedin.com/in/simonscottstromberg)

PROFILE

Cyber Resiliency and Business Continuity leader with 13+ years in global financial services, specializing in technology resiliency program management, enterprise risk mitigation, and industry-wide exercise leadership. Experienced in coordinating complex, multi-stakeholder recovery operations across IT infrastructure, business continuity, and third-party vendor ecosystems. Proven ability to assess how business functions engage with and depend on technology, identify resiliency gaps, and drive adoption of standardized practices that hold up under real conditions, not just audits. Known for influencing senior leaders, building cross-functional alignment, and translating technical risk into clear organizational action.

CORE SKILLS

Cyber Resiliency Program Oversight	Incident Response Coordination	Business Continuity & Disaster Recovery
Cloud Resiliency Awareness (AWS, Azure)	DR Planning, Testing & Failover Coordination	Executive Risk Reporting & KPI/KRI Development
Industry Resilience Exercise Leadership	ISO 22301 & BCP Lifecycle Management	Enterprise Resiliency & Risk Mitigation
End-to-End Process Mapping	Process Risk Assessment & Mitigation	Process Standardization & Harmonization
Continuous Improvement (Lean/Six Sigma)	Global Stakeholder Influence & Facilitation	Business Readiness & Change Adoption
Team Leadership & Cross-Functional Collaboration	Strategic Communications	Vendor & Third-Party Management
AI-Driven Transformation		

PROFESSIONAL EXPERIENCE

Wells Fargo

2023 – Present · Minneapolis, MN

Lead Technology Business Systems Consultant

- Provide oversight of technology resiliency and business continuity activities for critical enterprise systems and processes, ensuring alignment to enterprise operating models and regulatory expectations
- Assess how business functions engage with and depend on technology, identifying resiliency gaps and driving mitigation planning across end-to-end workflows
- Facilitate resiliency exercises, workflow walkthroughs, and cross-functional alignment sessions with technology and business stakeholders
- Develop risk dashboards, scorecards, and KPI/KRI reporting tools to track mitigation progress and communicate resiliency posture to senior leadership
- Integrate third-party and vendor resiliency requirements into business continuity plans, ensuring external dependencies are tested and documented
- Influence technology and business leaders to adopt standardized resiliency practices and close continuity gaps in alignment with enterprise risk frameworks

Wells Fargo

2021 – 2023 · Minneapolis, MN

Lead Tech Resiliency Remediation

- Directed enterprise-wide technology resiliency remediation initiatives, reducing risk across high-impact systems and critical business processes
- Partnered with architecture, engineering, and operations teams to identify root causes, define corrective actions, and track risk reduction to closure
- Built and maintained dashboards and executive scorecards to report remediation progress, risk posture trends, and accountability across teams
- Drove adoption of consistent remediation practices across multiple lines of business, accelerating issue resolution and reducing cycle time
- Communicated risk status and mitigation plans to senior stakeholders through structured, data-driven updates

Royal Bank of Canada (RBC)

2016 – 2021 · Minneapolis, MN

Senior Disaster Recovery Advisor & Manager, US DR Exercise Operations

- Served as enterprise exercise lead for SIFMA's annual operational resilience exercise, coordinating participation across all RBC lines of business including Capital Markets, Wealth Management, IT infrastructure, network operations, and third-party vendor partners
- Orchestrated end-to-end exercise execution including phased handoffs across IT recovery, business continuity, and front-office restoration, ensuring sequencing, timing, and vendor coordination executed as designed
- Participated in Quantum Dawn, SIFMA's industry cybersecurity simulation, supporting cross-LOB coordination and exercise readiness in a facilitation capacity
- Led participation in additional industry and regulatory resilience exercises including IROC, OFSI, Broadridge vendor resilience exercise, and US Federal Reserve resilience exercise coordination
- Facilitated scenario-based DR and continuity readiness sessions with global teams across technology and business, identifying gaps and driving standardized recovery improvements
- Partnered with hosting, infrastructure, and network teams to integrate continuity requirements into large-scale data center migrations
- Recognized with RBC Annual Performance Award for advancing continuity maturity across a globally distributed organization

RBC Wealth Management

2013 – 2016 · Minneapolis, MN

Disaster Recovery Analyst

- Supported enterprise DR and continuity readiness through process documentation, risk identification, and coordination of recovery exercises across US Wealth Management
- Embedded continuity requirements into new technology initiatives and data center migrations through early-stage analysis and stakeholder engagement
- Standardized continuity documentation enabling consistent adoption across functional areas
